

The Property Trust Platform That Changes Everything

True Property Intelligence

October 2025

A Foundation Built on Guesswork

At the heart of our economy sits our most significant asset: our home.

It's a source of security, pride, and aspiration.

Yet the entire ecosystem that supports it—insurance, finance, maintenance—operates on a foundation of guesswork, assumption, and bad data.

This fundamental breakdown of trust costs homeowners and businesses billions annually, turning moments of joy into sources of stress.

The UK property market desperately needs a new, transparent ecosystem built on undeniable clarity.

Our Vision: The Truth Platform

HomeTruth is building The Truth Platform, the UK's definitive, trusted source for property information. We are not merely a data company; we are the architects of a new, transparent ecosystem.

Empower Homeowners

Give every homeowner a clear, intelligent understanding of their most valuable asset

Enable Institutions

Provide insurers and lenders with verified, comprehensive property intelligence

Build Infrastructure

Create the indispensable data foundation for a proactive, fair property market

The Problem: £9 Trillion Market, Zero Trust

Property is broken:

63% face buyers regret their purchase within 6 months

<https://hoa.org.uk/news/housing-regrets/>

£10,000+ hidden costs hit buyers in year one

One in six UK adults admit to mortgage application fraud.

<https://www.cifas.org.uk/newsroom/1-in-6-uk-adults-mortgage>

Everyone loses:

- Buyers make life's biggest decision blind
- Lenders process mortgages on incomplete data
- Insurers price risk without property history
- The market runs on anxiety, not data

A £60B+ Insurance Market Flying Blind

£1.22

Unsustainable Losses

Insurers pay out as much as £1.22
for every £1 in premiums earned.

£1.8M

Daily Epidemic

"Escape of Water" claims per day - a prime example of reactive,
not proactive, risk management.

Systemic Inefficiency: The root cause is a lack of [trusted](#), dynamic, ground-[truth](#) data, leading to mispricing, fraud, and poor customer experiences.

Our Solution: The Dual-Flywheel

We help solve the data problem with a symbiotic model built on **Properties and People**.

The Property Flywheel

We achieve BREADTH by onboarding millions of properties onto our **Property Ledger**.

The foundational "skeleton"—a comprehensive database covering all ~28 million UK residential addresses.

Created by aggregating public and licensed datasets (Ordnance Survey, Land Registry, EPC Register, Verisk), it provides a baseline profile for every property from day one.

The People Flywheel

We achieve DEPTH by giving homeowners a free **HomeTruth AI Advisor** to enrich the Ledger with consented, ground-truth data.

The heart and soul—providing accurate and trustworthy information, proactive maintenance advice, acts as a secure digital vault, and offers impartial insights.

As homeowners engage, they co-create the deeper truth about their homes.

We're Building the Trust Layer for UK Property

Every property will soon have its "Home Truth"

We're Building the Trust Layer for UK Property

- Every home transaction will need verified data.
- Every landlord will need compliance tracking.
- Every buyer will want trusted guidance.
- Every property will have its digital truth.

1

2.62M Annual Transactions

How It Works: AI, Ledger & Blockchain Together

Our platform will integrate three powerful technologies to create the ultimate property trust layer.

→ A live, trusted record of what each home is really like.

Make smarter decisions with HomeTruth

Ask questions. Save answers. Upload documents.

Ask HomeTruth

Your AI copilot for buying, selling, and managing property.

HomeTruth AI Assistant Online

Hi! I'm your property assistant. What would you like to know?

What is leasehold?

Leasehold means you own the property for a fixed period, but not the land it's built on. The land belongs to the freeholder...

Try asking:

How much stamp duty will I pay?

What's my property worth?

Should I remortgage?

Ask any property question...

Receive personalized insights based on your specific situation

Save What Matters

Bookmark important information and create notes for future reference

We will prove the model in a single region, then scale.

Prove B2C Engagement

Validate that our AI Advisor is a compelling "hook" that drives user adoption and, crucially, data verification.

Create an Enhanced Dataset

Build a small but perfect, high-density, verified dataset for our pilot city (eg. Brighton).

Secure an Anchor Partner

Use this unique asset to secure our first B2B pilot, proving the commercial model with minimal risk.

Go-to-Market: Three-Phase Execution

A clear, milestone-driven path from pilot to national scale.

- 1** — Phase 1: Validate the Model (Months 1-12 | Brighton Pilot)
Launch the AI Advisor and populate the Ledger for Brighton.
Goal: Achieve target user density and data verification KPIs. Prove the B2C hook works.
- 2** — Phase 2: Secure Anchor Partner & Expand (Months 13-24)
Leverage the Brighton case study to sign our first B2B partner on a paid pilot.
Goal: Prove the commercial model and expand the playbook to London.
- 3** — Phase 3: Scale Nationally (Months 25+)
With a proven model and B2B revenue, raise a Series A to fund a city-by-city national rollout.
Goal: Become the de-facto data infrastructure for the UK property market.

Where We Are Today

Product

- MVP AI Advisor live at hometruth.io.
- Identified key data sources and schema for the Property Ledger.

Users

- [Early users](#) have tried the AI Advisor .
- Planning to seed initial property profiles in Brighton.

Partners

- Targeting potential pilots with insurtech providers, insurers and brokers.
- Establishing initial pilot agreement templates.

Tech & Data

- Stack: Cloud-native microservices using Node.js, React, and PostgreSQL.
- Next step: Ingesting [Land Registry](#), [EPC Register](#), and [Ordnance Survey](#) as foundational data.

Scalable B2B DaaS

During phase one, we won't charge consumers. Our aim is to build traction so we can charge businesses for access to validated data.

Revenue Source:

Tiered, Per-Property-Per-Year (PPPY) API subscriptions.

Clear B2B Value:

We enable insurers to price risk with precision, eliminate application fraud, and create frictionless customer experiences.

The Win-Win:

B2B partners sponsor a valuable free service for their customers in exchange for access to the consented, enriched data they need to win.

1 Platform, Multiple Revenue Streams

B2B Partnerships (B2B)

Mortgage brokers & insurers buy bulk subscriptions and/or pay for data

Direct Subscriptions (B2C)

Homeowners & landlords pay £10-200/month

Marketplace Commissions

Contractors & financial products pay for qualified leads

Verification Reports (B2B)

Professionals pay £20-25 per property report

Data Intelligence

Anonymised insights licensed to institutions

✅ Result: Multiple revenue per user, negative CAC through partnerships

The Opportunity & Grounded Projections

A credible, phased path to significant revenue.

Our 5-Year Projections Reflect Our Strategy:

1 — Years 1-2 (Pilot Phase)

Focus on B2B pilot revenue from 1-2 partners in our beachhead markets. Our primary focus is proving the model.

Target: ~£750k ARR.

2 — Years 3-4 (Expansion Phase)

Roll out to 3-5 major UK metro areas.

Target: ~£6M ARR.

3 — Year 5 (Scale Phase)

On a clear path to national coverage with a proven, scalable sales model.

Target: £15M+ ARR.

2–18 Month Plan & KPIs

North Star Metric:

Homeowner-verified properties in active partner regions.

1 12-Month Targets (Pilot phase)

- Brighton pilot live with the AI Advisor + Property Ledger.
- 10,000+ properties in Brighton with basic profiles.
- 2,000+ homeowner-verified properties (truth score above [X]).
- 1–2 paid pilots with insurers/brokers using HomeTruth in onboarding.
- Initial ARR in low six figures from these pilots.

2 18-Month Targets

- Expand to a second region (e.g. London borough).
- 25,000+ homeowner-verified properties across pilots.
- 3–5 B2B partners on paid pilots or early contracts.

Data, Privacy & Trust by Design

Architected for GDPR

- Separate Property Ledger (property facts) from Identity Layer (personal data).
- Minimal personal data; clear consent and control for homeowners.

Clear Legal Position

- Legitimate interests for building and improving the Property Ledger.
- Contract/consent for the advisor experience and any marketing.
- Partners remain the regulated decision-makers for lending/underwriting.

Transparency for Users

- Simple, human privacy policy.
- Self-service access and deletion: “Download my data” and “Delete my account”.

This approach anticipates and addresses potential “GDPR / liability” questions, ensuring a trustworthy platform from the ground up.

The Team

Monty Munford

Monty advises the world's fastest-growing companies in blockchain, AI and NFTs on growth and visibility. In the past decade his consultancy has helped more than 40 companies raise money/exit for a total of \$1.4 billion.

He writes regularly for the BBC and The Economist and has been a tech columnist for Forbes and The Telegraph. He also has interviewed figures on stage such as Tim Draper, the late John McAfee, Sir Tim Berners-Lee, Steve Wozniak, Kim Kardashian, Guns N' Roses and many others.

Jason Ryan

With a PhD from Imperial College, Jason pivoted from academia to digital innovation and transformation, leading programmes for MoMA New York, Universal Pictures, Barclays, Nike and The Economist, notably developing a pioneering owners platform for Porsche AG. He brings significant go-to-market experience, having collaborated with Private Equity firms on GTM strategies and the strategic use of AI.

As a co-founder and CSO of Brilliant Noise, Jason influenced over 350 professionals and generated over £50M in turnover. Jason has recently been appointed as a Design Council Expert in recognition of his expertise in integrating technology, innovation and strategic creativity.

The Ask: £500K Pre-Seed

To Prove the Model and Achieve Key Milestones.

Team (~60%)

- 1 senior engineer for core platform & data development.
- 1 junior marketer/community lead for Brighton outreach and online engagement.
- Founders will lead product development, strategic partnerships, and overall strategy.

Product & Data (~25%)

- Build and harden the Brighton Property Ledger, expanding data sources and integrity.
- Enhance the AI Advisor and homeowner experience with new features.
- Secure data licensing, infrastructure, and ensure robust security measures.

Operations & Compliance (~15%)

- Cover legal fees, GDPR/privacy adherence, and essential operational costs.

Milestones This Round Unlocks

- 1 10,000+ homeowner-verified properties in Brighton, building a critical mass of trusted data.
- 2 1–2 paid insurance/broker pilots established, demonstrating clear ROI and market fit.
- 3 Achieve initial £100,000–£250,000 Annual Recurring Revenue (ARR) and validate a repeatable playbook for expansion.
